NOTICE OF REJECTION

=====

Claims 1-3 are rejected under 35 U.S.C. § 103
as being obvious over US7654321
in view of US6543210.

Examiner Argument:

The cited references, when combined, render the
claimed microchannel cooling
system with non-uniform cross-section obvious.
US7654321 discloses microchannels
with width modulation, and US6543210 teaches the
use of copper as a thermal
conductor. The combination yields predictable
results.

Claims 4-5 are rejected under 35 U.S.C. § 102
as anticipated by US7654321.
The reference discloses every limitation of these
claims.

Applicant must respond within THREE MONTHS from
the mailing date.
